Declaration of Compliance

REACH · Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR) · Product safety

Issued by	Plastdurker Kft. HU-1113 Budapest, Badacsonyi utca 13/A Tax no.: 12317011-2-43 · Company reg. no.: 01-09-665605
Product	**THERMAL LAMINATION FILM, SANDY MATTE** – BOPP film with a sandy-textured matte surface and a heat-activated adhesive layer, 50 µm
Manufacturer	EU / non-EU film manufacturer as stated on the delivery note and product label; full identity and address available on request
Intended use	Lamination of printed paper and board by heat and pressure (book covers, folding cartons, rigid boxes, luxury and cosmetic packaging, business cards). **Not intended for direct contact with food.**
Scope	Product supplied by Plastdurker Kft. from approved manufacturers whose supporting declarations are held on file
Document no.	PD-DoC-THERM-2026-10
Date of issue	02/10/2026
Valid until	01/10/2027 (12 months from issue), or until a change in composition or legislation

1. Purpose and status

Plastdurker Kft. declares that the thermal lamination film described above complies with the requirements below when used as intended. The film is applied to the **outer, printed side** of paper and board. It is not a food contact material under Regulation (EU) No 10/2011 and is not intended to come into direct contact with food.

If laminated board is used for food packaging, the film must be on the side facing away from the food. The converter and the packer remain responsible for assessing the finished packaging under Regulation (EC) No 1935/2004 and good manufacturing practice (Regulation (EC) No 2023/2006), including possible set-off and migration through paper and board.

2. REACH – Regulation (EC) No 1907/2006

The film is an **article** within the meaning of Article 3(3) of REACH. It has no intended release of substances, so registration under Article 7(1) does not apply. According to the manufacturer, it does not contain any substance on the ECHA Candidate List of Substances of Very High Concern (SVHC), as updated on 4 February 2026 (253 entries), in a concentration above 0.1% (w/w). It contains no Annex XIV substances, and the restrictions of Annex XVII are respected.

3. Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR)

When laminated board is placed on the market as packaging, the film becomes a packaging component. For that use Plastdurker Kft. declares, based on the manufacturer's information:

3.1 Heavy metals – Article 5(4). The sum of the concentrations of lead, cadmium, mercury and hexavalent chromium in the film does not exceed **100 mg/kg**.

3.2 PFAS – Article 5(5). PFAS are not intentionally added to the film. The PFAS limits of Article 5(5) (25 ppb for any individual PFAS, 250 ppb for the sum of targeted PFAS, 50 ppm total fluorine) apply to food-contact packaging; where laminated board is used for food packaging, the film complies with these limits.

plastdurkereszak@gmail.com

3.3 Substances of concern – Article 5(1). The presence of substances of concern is minimised, as described in section 2.

3.4 Recycled content and recyclability – Articles 6 and 7. The film is made from virgin polymers. Thin plastic lamination on paper and board is generally accepted in paper recycling, but the plastic share affects the recyclability grade of the finished packaging, which the packaging manufacturer must assess once the delegated acts under Article 6 are adopted.

4. Other substances and requirements

- Heavy metals: no additives based on cadmium, lead, mercury or hexavalent chromium are used.
- Bisphenol A and other hazardous bisphenols, ortho-phthalate plasticisers and PFAS: not intentionally used.
- The product is not classified as hazardous under Regulation (EC) No 1272/2008 (CLP). See the Safety Information Sheet.

5. Notice

This declaration covers only the film in its original form, as supplied by Plastdurker Kft. It does not cover the laminated product or later processing (UV varnishing, hot-foil stamping, gluing). Traceability is ensured by the roll number on the label and the Plastdurker delivery note. This declaration is valid for 12 months from its date of issue, or until a change in composition or legislation.
